Facility Access and Shipment Tracking (FAST)

Release 19.1 – External Release Notes – Version 1.0

The FAST 19.1 Release will be deployed on January 22, 2012. Any changes to the Release Notes are outlined in this document and also in Appendix A (when applicable).

Chapter 1 External FAST Users (Customers)

I. Online User Interface

   A. General

     1. Users may associate Stand-Alone Content to Appointment Shells via the FAST Online Application. Previously, FAST would generate a system error when attempting to associate Content to Appointment Shells.

   B. Customer / Supplier Agreements (CSAs)

   No CSA enhancements will be included as part of this release.

II. FAST Web Services

     1. The DeliveryContentUpdateResponse message will now generate an error if the original SchedulerContentID / ConsigneeContentID combination is not provided. Previously, content updates were allowed for mis-matching SchedulerContentIDs.

     2. Users may now update Origin Entry Content created via web services using the DeliveryContentUpdateRequest message. Previously, FAST would generate a 314 error when attempting to update Origin Entry Contents.

Appendix A – Changes to Version 19.1

The following table represents the changes from the previous version of the Release Notes for the FAST 19.1 Release.

Note: Section numbers referenced below reflect numbers after additions/deletions have been made and may not correspond with the section numbers of the original (or revised) document. Minor grammatical and spelling changes made are not included in the table below.
